

CANCER PREVENTION & RESEARCH
INSTITUTE OF TEXAS

Award ID:
10-21

Project Title:
Physician Oncology Education Program

Award Mechanism:
Legacy Grant

Principal Investigator:
Gonzalez, Stephanie

Entity:
Texas Medical Association

Lay Summary:

The Physician Oncology Education Program (POEP) provides Texas physicians and physicians in training (medical students) with the knowledge necessary to reduce cancer morbidity and mortality through the provision of continuing education programs and resources. The project collaborates with public, private, and volunteer partners around the state to accomplish its goals. The Texas Medical Association Special Funds Foundation (TMA) continues to provide staff and administrative support, performing coordination and oversight functions, and providing access to resources. A steering committee of physicians and other key experts in cancer and medical education centers statewide will continue to provide strategic guidance and medical oversight for the program. POEP staff and its steering committee annually update a five-year strategic plan.
